Taking the Assessment:

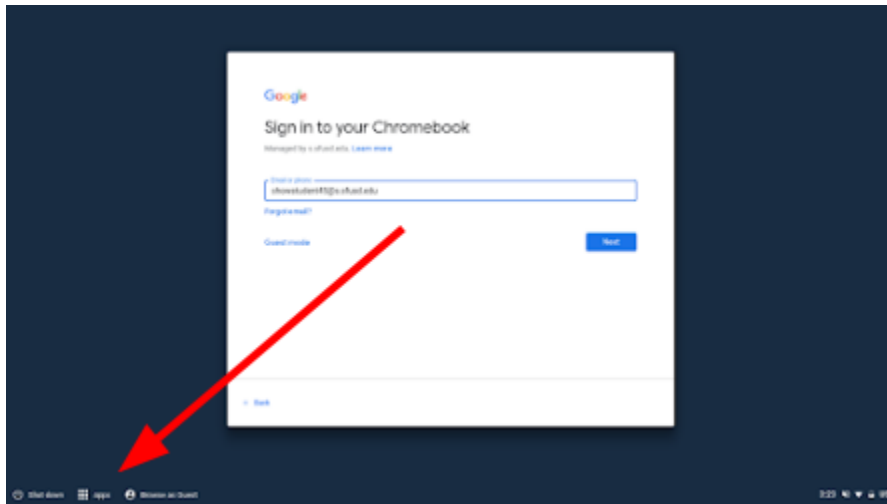

The ACT consists of the four subject tests listed above, each test is individually timed. You can take all four exams consecutively as you would during an actual ACT, or you can take them over several days. You are in charge of setting your own schedule but for the most realistic ACT practice experience you should take all four exams consecutively, allowing for a 10 minute break between exams 2 & 3. Once you start a subject exam the timer on your Chromebook will start and you must complete each subject exam within a single sitting as the exam will shut down when the time has expired. You will use the test booklet to read the questions and you will mark your answers on a digital answer sheet on your Chromebook.
