

# MARQUETTE WATER POLO

## PROGRAM MISSION

Marquette Water Polo is committed to success inside and outside of the pool. We will achieve this with an everlasting work ethic towards being role model citizens, students, and athletes. We strive to be the best person we can be each and every day through adversity and struggles which will help us build a successful future individually and collectively.

Role Model Citizens – We make good choices and decisions inside and outside of the pool. Opposing teams, parents, and other members of the community will have a positive view of our entire program. We continue to show good values as we move towards our future goals.

Role Model Students – We are pro-active in our academics. We put our studies first and put the time in necessary to succeed in the classroom. We plan to use academics to help reach the goals of our future knowing this is the single most important piece of our work.

Role Model Athletes – We play with respect for the game, officials, teammates, and opposing team/fans. We give 100% on every play, every practice, and every game. We set the example for future Mustangs to carry themselves with pride and dignity during practice and competition.
